RESPONSE UNDER 37 CFR 1.111

Dear Sir:

In response to the Office Action of August 23, 2004, please amend this application as follows:

In the claims:

1. (currently amended) A method for operating a fault-tolerant server group in client-server distributed dynamic network systems, comprising: receiving, by a master server in a fault-tolerant server group, a request sent by a client, said fault-tolerant server group comprising said master server and at least one back-up server, said master server registering its mastership in a name server and communicating with both said client and said at least one back-up server, every server in said server group, including said master server and said at least one back-up server, having a self-monitoring mechanism, said self-monitoring mechanism that operates in said master server and said at least one back-up server to ensure ensuring that said fault-tolerant server group has a consistent mastership situation; processing, by said fault-tolerant server group, said request
